

Concerned Citizens of Montauk (CCOM), in partnership with the Surfrider Foundation’s Blue Water Task Force (BWTF), regularly tests waterbodies in Montauk, Amagansett, and East Hampton for the bacteria *enterococcus*. CCOM processes the water samples in the CCOM office lab and then inputs test results on the BWTF online portal. *Entero* levels at 104 and above are considered a risk to human health; it is often due to heavy rains, extreme high tides, and/or warm water temperatures. **Intensive monitoring and/or remediation projects are planned or in place at the locations marked with an asterisk (*)**

Georgica Pond sites are currently being processed by Surfrider at the Stonybrook Southampton Lab

Concerned Citizens of Montauk (CCOM), in partnership with the Goble Lab at Stony Brook Southampton, monitors Fort Pond for toxic blue-green harmful algae blooms (cyanobacteria). CCOM delivers samples to the Lab, which posts bloom occurrences online on the DEC HAB Notification page. Blue-green levels at 20ug/L and above are at high risk of a bloom.
