

Concerned Citizens of Montauk (CCOM), in partnership with the Surfrider Foundation’s Blue Water Task Force (BWTF), regularly tests waterbodies in Montauk, Amagansett, and East Hampton for the bacteria *enterococcus*. CCOM processes the water samples in the CCOM office lab and then inputs test results on the BWTF online portal. *Entero* levels at 104 and above are considered a risk to human health; it is often due to heavy rains, extreme high tides, and/or warm water temperatures. **Intensive monitoring and/or remediation projects are planned or in place at the locations marked with an asterisk (*)**

Concerned Citizens of Montauk (CCOM), in partnership with the Gobler Lab at Stony Brook Southampton, monitors Fort Pond for toxic blue-green harmful algae blooms (cyanobacteria). CCOM delivers samples to the Lab, which posts bloom occurrences online on the DEC HAB Notification page. Blue-green levels at 20ug/L and above are at high risk of a bloom.
