CCOM AND MONTAUK SCHOOL ANNOUNCE SCIENCE FAIR WINNERS

Montauk, New York – On Friday, January 25th the Montauk Public School and Concerned Citizens of Montauk (CCOM) partnered to present the 2019 Montauk School Science Fair.

Over 100 student projects were evaluated and scored by a panel of 18 judges representing the Montauk community and regional environmental organizations including the Peconic Estuary Program, The Nature Conservancy, South Fork Natural History Museum, and Peconic Bay Keeper. All 7th and 8th grade winners are eligible to advance to the Long Island Science Congress regional competition, and the 3rd through 6th grade first place winners are eligible to advance to the Elementary Science Fair at Brookhaven National Lab.

“CCOM is happy to help organize this event every year with the School,” says Environmental Advocate Kate Rossi-Snook. “It is so important to expose kids to different forms of scientific exploration and the environmental community, and every year the judges have a blast interacting with them. We are very proud of all of the student participants – well done!”

The winners, who will be honored later in February at a ceremony at the School are as follows:

8th Grade

1st Colin Tyrell
2nd Emily Ryan
3rd Mya DelPercio

7th Grade

1st Gianna D’Agostino, Mia Reinhardtsen
2nd Sophia Frazier, Gabrielle Payne
3rd Katie Bruno, Amina Guebli
4th Nina King
5th Scarlet Flight
