

FOR IMMEDIATE RELEASE
WATER TESTING RESULTS: WEEK OF JULY 13, 2020

Concerned Citizens of Montauk (CCOM) regularly tests waterbodies in Montauk, Amagansett, and East Hampton for the bacteria *enterococcus*. CCOM processes the water samples in the CCOM office lab and then shares the results on the Surfrider Foundation’s Blue Water Task Force (BWTF) online portal. *Entero* levels at 104 and above are considered a risk to human health; it is often due to heavy rains, extreme high tides, and/or warm water temperatures.

Intensive monitoring and/or remediation projects are planned or in place at the locations marked with an asterisk (*)

Concerned Citizens of Montauk (CCOM), in partnership with the Gobler Lab at Stony Brook Southampton, monitors Fort Pond for toxic blue-green harmful algal blooms (cyanobacteria). CCOM delivers samples to the Lab, which shares bloom occurrences online through the NYS DEC HAB Notification page. Blue-green levels at 20ug/L and above are at high risk of a bloom and triggers toxicity testing; DEC considers a concentration of 25ug/L and above as a bloom.

LOCATION	BLOOM STATUS	BLUE-GREEN LEVEL	INDICATION OF
Fort Pond: Industrial	No Bloom	12.90	Medium Risk
Fort Pond: Ramp	No Bloom	16.55	Medium Risk
Big Reed Pond	Bloom	46.05	High Risk
