

Concerned Citizens of Montauk (CCOM) partners with the Surfrider Foundation Eastern Long Island Chapter and Peconic Baykeeper to monitor East End water bodies for the bacteria enterococcus. CCOM tests locations in Montauk, Amagansett, and East Hampton, processes the water samples in the CCOM office lab and shares the results with the public through press releases and the Surfrider Foundation’s Blue Water Task Force (BWTF) online portal. Entero levels at 104 and above are considered a risk to human health. High levels are often due to heavy rains, extreme high tides, and/or warm water temperatures. Levels <10 are considered below the detection limit of the test. *Intensive monitoring and/or remediation projects are planned or in place at the locations marked with an asterisk (\*)*.

LOCATION	ENTERO LEVEL	INDICATION OF
<b>MONTAUK</b>		
Lake Montauk: Harbor*	213	High Bacteria
Lake Montauk: Causeway South*	63	Med Bacteria
Lake Montauk: Little Reed Pond Creek*	479	High Bacteria
Lake Montauk: Nature Preserve Beach*	292	High Bacteria
